

Key Location Plan 1:2000

Zoom Plan Focus Area

**Sculptures**  
Wooden and stone sculptures will also be introduced. All key nodes and glades to add interest, play opportunities and character. Local artists would be encouraged to transform the surplus stone on site into a feature.  
Please see indicative imagery to the right >

**Stepping Stones**  
Timber poles cut to various sizes and heights, set in a cluster for children to negotiate between.  
Age Range: 2+ years  
Installation Information: Area Required: 3.3m x 3.2m  
Critical Fall Height: 0.4m  
Safety Surfacing: 0.05m

**Turning Stone**  
Our sense of space and time is characterized by our own body mass and the speed of movement. Settling into motion the slightly larger mass of the Turning Stone requires either much more time or strength than is required to move ourselves. The possibilities exist of bringing the large mass of the Turning Stone into motion. This can be achieved by means of extreme effort over a short period of time. The second possibility however is assisting merely by exerting a slight force. It is possible to set the massive stone block into a rotating movement which becomes faster and faster, provided that the stone continues to be pushed long enough. This can even be achieved merely by using your little finger.  
Age Range: Recommended for children, schoolchildren, young people, adults, older people.  
Suggested location: Public open areas without supervision, such as playgrounds, parks or similar.

**Fallen Log**  
Fallen Logs make an amazing feature for children to climb, balance, explore and develop their imaginations.  
Reclaimed from site or reclaimed timber sourced from play supplier. To be less than 600mm above ground at highest point.  
Age Range: All ages, from imaginative play to resting and gathering.  
Preparation: Bark removed and all surfaces sanded and oiled, ends primed where necessary to reduce splitting.  
Installation Information: Surfacing requirements corresponding to a fall height of 0.60 m
